
a
Hydraulic agreement
Identity line indicates exact agreement
Operational
Stress
Closed-PDA pressure (m)
EPANET pressure (m)
b
Bland-Altman consistency
Operational
Stress
Closed-PDA - EPANET (m)
Mean pressure (m)
c
Error across hydraulic quantities
Operational
Stress
Pipe velocity
Pipe flow
Node pressure
Friction loss
Emitter demand
Absolute percentage error (median; 25th-95th percentile)
d
Convergence effort
Cumulative fraction
Fixed-point iterations
